# TWINSTRAND™
BIOSCIENCES

Sequencing data is easily corrected using DuplexSeq™ software.

Our purpose-built solution provides:

- Easy-to-use, secure cloud-based software hosted on DNAnexus®
- Duplex error-corrected sequences, variant calls, and assay quality metrics from raw reads
- Industry standard formats compatible with popular bioinformatics tools and databases
- Off-the-shelf, ready to use analysis packages for AML and Mutagenesis
- Collaborative analysis when using Universal Kits or for custom projects- please contact us

To Get Started

1 Register for access to our DuplexSeq software by emailing us at support@twinstrandbio.com
  - Existing DNAnexus users, simply include your username in the email
  - New DNAnexus users, include the following: Full Name
                                                   Email Address
                                                   Desired Username

2 After your request has been received, expect confirmation of registration via email

3 Visit the TwinStrand Community Portal for access to DuplexSeq Apps, user guides, and support tools:

https://platform.dnanexus.com/panx/communities/twinstrandbio

For additional questions or support,
